

INTEGRATIVE MEDICINE GRAND ROUNDS

Tuesday, April 5th @ 8am (US ET)

[Register Here for the Zoom Webinar](#)

The Psychedelic Renaissance in Psychiatry

Dr. Franklin King will give an overview of the clinical and non-clinical use of psychedelics—past and present. He will discuss the mechanisms used and the current paradigm of psychedelic assisted therapies. Dr. King will conclude by sharing some of the challenges facing the use of psychedelics in a therapeutic context today.

Speaker Biography

Dr. Franklin King is the director of training and education at the Mass General Center for the Neuroscience of Psychedelics and a clinical instructor at Harvard Medical School. His primary clinical and research interest is in the utilization of psychedelic-assisted psychotherapy to treat a variety of chronic psychiatric conditions, including depression and anxiety disorders, and in strategies to optimize these interventions for different patient populations. In addition, Dr. King teaches and supervises residents and fellows at Mass General, and practices clinically as a staff psychiatrist at the [Center for Anxiety and Traumatic Stress Disorders](#) as well as on the [Acute Psychiatry Service](#) in the Emergency Department.

Dr. King received his MD from the University of Massachusetts and completed a residency in psychiatry at Mass General and McLean Hospitals, serving as the chief resident on the Consultation-Liaison Service. Following graduation, he completed a fellowship in Consultation-Liaison Psychiatry as well as a research fellowship with the Mass General [Cardiac Psychiatry Research Program](#)
